ROHAN JAMADADE

NETWORK ENGINEER | ENTERPRISE NETWORKING | NETWORK SECURITY

9511749739 | Jamdader76@gmail.com | linkedin.com/in/rohanjamadade | github.com/rohanjamadade

PROFESSIONAL SUMMARY

Network Engineer with 3.2 years of experience supporting enterprise LAN infrastructure, network operations, infrastructure refresh projects, and firewall security. Experienced in Cisco Catalyst 3650/9300 switches, VLANs, trunking, inter-VLAN routing, Layer 2 troubleshooting, Cisco DNA Center, and Palo Alto firewall operations. Knowledge of OSPF and EIGRP concepts, NAT, IPsec VPN, Cisco ISE Level 1 operations, and enterprise wireless infrastructure. AWS Certified Solutions Architect – Associate, focused on reliable connectivity, secure network operations, incident management, and continuous improvement.

TECHNICAL SKILLS

Networking: Enterprise LAN/WAN, TCP/IP, IP Addressing and Subnetting, VLAN Configuration, 802.1Q Trunking, Inter-VLAN Routing, STP, Layer 2 Troubleshooting, Root Cause Analysis (RCA)

Routing Protocols: OSPF (Concepts), EIGRP (Concepts)

Switching and Network Platforms: Cisco Catalyst 3650/9300, Cisco DNA Center, Zero-Touch Provisioning (ZTP), SDN-Based Deployment Workflows

Network Security: Palo Alto Firewalls, Security Policy Configuration, Firewall Rule Creation and Modification, NAT, IPsec VPN Configuration and Troubleshooting, Access Control Lists (ACLs), Port Security

Network Access and Wireless: Cisco ISE (Level 1 Operations), Network Access Control (NAC), Enterprise Wi-Fi Upgrades, Wireless Troubleshooting

Operations and Documentation: Incident and Change Management, SLA Adherence, Network Documentation, Audit and Compliance, Active Directory Integration

PROFESSIONAL EXPERIENCE

Network Engineer | Tata Consultancy Services (TCS) | June 2023 – Present

- Managed incident and change management activities for enterprise network operations, supporting timely resolution, minimal service disruption, and SLA adherence.
- Configured and managed VLANs, trunking, and switch provisioning through Cisco DNA Center, reducing deployment time by approximately 30%.
- Supported enterprise LAN environments serving thousands of endpoints and participated in infrastructure migration activities.
- Troubleshot Layer 2 connectivity issues, contributing to a 25% reduction in mean time to resolution (MTTR).
- Configured and modified Palo Alto firewall security policies and NAT rules to support business application connectivity.
- Troubleshot firewall connectivity issues involving rule conflicts, NAT translations, and inter-zone traffic restrictions.
- Supported IPsec VPN configurations for secure site-to-site connectivity.
- Managed firewall port-opening workflows and access-control changes in line with security requirements.
- Performed Cisco ISE Level 1 operations, including authentication-failure checks, endpoint profiling, and policy-enforcement support.
- Supported upgrades and stabilization of 400+ enterprise wireless devices, helping reduce recurring connectivity incidents.
- Supported network environments integrated with Active Directory serving more than 15,000 users across multiple business units.
- Automated network documentation templates, reducing manual update effort by 40% and improving audit accuracy.
- Supported new project onboarding from planning and execution through user acceptance testing (UAT), maintaining SLA commitments.

EDUCATION

Bachelor of Technology (B.Tech) – Chemical Engineering
P.V.P.I.T., Budhgaon | 2019 – 2022

CERTIFICATIONS & TRAINING

- AWS Certified Solutions Architect – Associate
- Networking Fundamentals & SDN Concepts – TCS
- Generative AI Training – TCS
